ACCU Supports the Promotion of Credit Unions in Bhutan

ACCU presentation on credit unions as a means for socioeconomic development of people at the international seminar on October 8-9 in Thimpu created an enthusiasm to introduce financial services to existing 16 rural cooperatives in Bhutan. Thus, the 8th recommendation of the seminar stated the establishment of linkage with ACCU to wit: *Difficult access to financial resources is also a major constraint in the development of cooperatives and learning from the vast experiences of ACCU (Association of Asian Confederation of Credit Union), it is recommended that Bhutan could gain and benefit from its association with the ACCU.* The conference organized by the Department of Agriculture Marketing and Cooperatives (DAMC), Ministry of Agriculture and Forests immediately contacted ACCU. As a first step, ACCU will host a study tour to Thailand for 9 technical staff of DAMC on November 25-December 11. The study visit is aimed at chartering a credit union development plan which will be implemented by DAMC, the regulatory body for cooperatives. The cooperative act in Bhutan was only passed by the parliament in 2009. DAMC recognizes the need to build its capacity to promote and strengthen cooperatives in Bhutan.

More than 2,600 cooperators attended the summit as well as the celebration of the International Year of Cooperatives hosted by ICA, Desjardins Group and St. Mary's University in Quebec City on October 8-11. "This Summit's theme, "The Amazing Power of Cooperatives", is meant to evoke the idea that the cooperative movement represents a long-term solution that can help establish a more solid, democratic and equitable economic system," indicated ICA's President Dame Pauline Green in her welcome message.

The Chair of the Board, President and CEO of Desjardins Group Monique F. Leroux has this to say: "Sustainable prosperity is the creation of wealth through economic development that respects people and their environment, for the benefit of present and future generations." Desjardins, now a museum. F.W. Raiffeisen and A. Desjardins shared common characteristics.
